

# ArchivesSpace Staff Interface Working Group

Member-led working group to enhance, streamline, and make the staff user interface (SUI) of the ArchivesSpace software application more accessible.

- Review, in order to de-dupe and enhance where necessary, outstanding [JIRA issues](#) submitted by the community over the years regarding the staff interface.
- Identify areas of interest not covered by existing JIRA issues.
- Identify accessibility gaps in the current staff interface.
- Based on the group's research and [member feedback](#), develop organized recommendations for staff interface improvements.
- Once finalized, work with the ArchivesSpace Program team and others to use the recommendations as the basis for a comprehensive specification for the look and feel of the next version of the staff interface.
