

Staff Interface Enhancement Working Group Recommendations

TABLE OF CONTENTS¹

[Introduction](#)

Visual Layout

Overview	1
Accessibility	1
Staff Login	4
Functionality of Logged in Staff in PUI	5
Customization and repository-specific branding	7
Designing for the “F”	8
Experimenting with Page Layout	9
Layout for Editing Resource Record	9
Locations and Instances	12
Visual Layout of Notes	14
Confirmation of actions	15
Mobile Interface	16

Data Entry and Editing

Overview	2
Editing Resource Records	2
Comprehensive Bulk Edit Solution: Rapid Edit Mode	2
Individual-Fix Approach to Bulk Edits	5
Level of Description Bulk Edit	5
Container Instance Bulk Edit	5
Bulk Delete	5
Existing edit functionality improvements	5
Selecting multiple items in reorder mode	5

¹ Please note that there are individual documents for each of these large headings which the Table of Contents intellectually brings together. Each of the subheadings are hyperlinked to the original Google documents.

Responsiveness	6
Multiple Dates issue	6
Refining Merge Function	7
When Multiple Users Edit the Same Resource	8
When Users Edit Related Records	10
Simple Data Entry in Resource Records	11
Save	11
Step-back	12
Add children/siblings	12
Option to Control “Language” elements	12
Resize Notes “Content” subfields	13
Copy/clone elements	13
Rapid Data Entry	13
Add/Reorder Rows	13
Manage Templates	14
Add Keystroke Shortcuts	14
Change Validating Behavior	14
Add Container Profiles to Top Containers in RDE	15
Add Agents/Subjects Columns	15
Spawning Records	16
Spawn Resource Components from Accessions	16
Increase Spawn data field transfer flexibility	17
Merge default values while spawning an accession from a resource	17
Terminology	17
Editing Events	18
Show Events when accession/resource/digital object/Agent/Subject is in Edit mode	18
Add Event from within accession/resource record	18
Auto-generate Events from Collection Management actions	20
Jargon and Documentation	21
Controlled Value Lists	21
Navigation	21
Merging Values	22
Linking Records throughout the System	25
Bidirectional Linking	25
Classification Records	25
Agents and Subjects	
Overview	1

Links of Agent records to archival objects (resource components) and digital objects component records to be displayed as part of the list of collections / materials to which an agent is related	2
Resources and Accessions of Child Agents should appear in Parents linked records list (AR-1764)	4
Show all Linked Agents in an Agent Record (AR-1768)	7
Managing Agents and Subjects	9
Merge or bulk select Agents or Subjects	9
Sort Agents and Subjects attached to a record	12
Subject records	12
Batch-relating subjects	13
Top Containers	
Overview	1
Top Container Navigation	1
Issue 1: There's no way to create Top Container profiles from the main drop down menus.	2
Issue 2: How to enter a Top Container is confusing - the small arrow to the right of the box is not labelled or immediately apparent to a new user.	2
Issue 3: When clicking "Browse Top Containers," it comes to a place where you have to search for the collection you were just working on.	3
Issue 4: Browsing Top Containers currently is problematic because the Search button is currently hidden from view and most people would instinctively click on "Link to Top Containers," which doesn't accomplish the task or yield search results.	3
There are no breadcrumbs back to the list of boxes for a particular record within the Top Container feature - AF-1716	7
Adding Container Instances in RDE	9
Add the ability to link Container Profiles, ILS holdings, and location to RDE Container Instances	9
Issue: It should be possible to link an archival object to more than one Top Container in RDE.	10
Issue: There are too many steps to edit/add a Top Container Profile to a previously created Top Container	12
Autofill of "Top Container" field	13
Manage Top Containers functionality	14
Bulk Edit Multiple Locations	14
Merge Top Containers	15
Background Jobs:	
Overview	1
Renaming/Clarifying "Background Jobs"	1
	3

Background Jobs Menu Clarification	2
Functionality and Visual Layout of Background Jobs	3
Jobs list view and search functionality	4
Completed Jobs functionality and view	6
Current view of New Background Job -- Reports:	8
Proposed view of the Reports List view	8
Export menu functionality of Print Resource to PDF	9
Accessions integration with Import/Export/PDF functions	9
Additional topics	10
CSV Importer	10
Download CSV	10
Customize File Naming for Export Background Jobs	11
Organization of Menus	
Overview	1
Issue: Consolidate administration in a single place (ANW-101) and System v. Cogwheel.	1
Browse Menu	5
Create Menu	6
Browsing, Customization, Functionality, and Terminology	
Repository-specific Templates/Customized Fields	1
Search and Browse Data Display	2
Browsing Resources	4
Moving Last Modified section	4
Easy expand all/collapse all view AR-1769	5
Browsing sidebar	6
Refine Search Results	6
Terminology	9
"Revert Changes" to "Cancel Changes"	9
"Publish" checkbox to "Public"	10
Feature Requests	10
Show last created Accession and Resource numbers	10
Spell Check	10
Version Control	11
Mitigating trailing whitespace	11

Assess Collection Management Module	12
